

# Ensure vulnerable children reach their full potential

## Early Intervention Solution

### Improve the quality of life for children in your state

To offer children and families essential services and support, your agency needs the proper technology and business processes to effectively administer your Early Intervention (EI) program.

Gainwell has deep experience working with states on their EI programs.

The Gainwell Early Intervention Solution can assist you with:

- Provider enrollment and tracking
- Fiscal agent and finance office services
- Customized data reporting
- Claims processing and payments
- Third-party and Medicaid billing and funds management
- Family cost participation management
- Provider and family call center support
- Technical help desk
- Outcome data collection and reporting
- Enhancement of legacy data systems
- Data sharing and system integration

### Gainwell Early Intervention in action

Gainwell is skilled in helping programs centralize and manage data to yield desired program results. We have experience with different models of statewide EI data systems, and our customized systems serve EI programs with varying needs and program designs. Gainwell's professional hosting and cloud services offer high availability and reliable security to meet HIPAA and FERPA requirements, and we tailor infrastructure alternatives to meet your state's unique needs.

#### Benefits

- Support your state's goals to meet the needs of families and children
- Work with a trusted partner to create a customized solution for your state's unique requirements
- Enable your program to meet state and federal requirements for IDEA Part C with a broad range of integrated services including state-of-the-art case management and family cost participation processing

# 25

Years working with the Early Intervention community

# 7

State programs supported implementing IDEA Part C

Gainwell assists Early Intervention programs with evolving priorities, helping you consider options to improve outcome collection, share data across programs, explore mobile applications and telehealth, evaluate how common data standards fit into your organization or re-evaluate your service model.

### **Early Intervention highlights**

Having worked with many states over the past 25 years, we have developed extensive IDEA Part C program and technical expertise and can design a technology solution that will provide the best results for your program.

### **Early Intervention data system**

An EI data system provides users the ability to successfully manage statewide EI data outcomes and achieve key compliance measures.

The fully online Individualized Family Service Plan (IFSP) offers state users unprecedented data monitoring capabilities. Data system features include:

- Extensive child and family data capture
- Powerful search and navigation options that streamline monitoring of children within the initial 45-day period, children exceeding their 45-day period or approaching transition to Part B
- Controlled workflows configured to your state's requirements
- Online child library that allows documents to be stored with the child record
- A secure environment that restricts system and data access based on defined user roles
- Consistent quality of data through edits and cross-checks
- Ability to capture all data required to support a child in the EI process
- Powerful reports that can be accessed by users specific to their security role
- Mobile access enabled through mobile browser compatibility

### **Provider enrollment and tracking**

Our custom applications facilitate an unlimited number of enrollment forms, credential and licensing requirements, as well as track background clearance, professional development and liability coverage. Web-based reporting tools keep you informed about your service provider base and report on workforce indicators necessary for shared data systems.

With a long heritage in the technology industry, we have the experience to assemble solutions that bring together emerging and evolving technologies from across industries.

### **Outcome data collection and reporting**

Gainwell helps you leverage solutions that allow you to evaluate and report effectiveness and plan for improvement.

- Tools that allow families to report on their child's progress
- Data collection and documentation avenues for providers as they work with children and families
- Results of evaluation and assessment of children as they enter and progress through the program

### **Data systems integration**

Gainwell is skilled in helping states enable integration and interoperability of their EI data systems with other early childhood systems, data warehouses, Medicaid and other third-party payers, and Master Participant Indexes (MPI). This reduces duplicate data entry, simplifies information sharing and provides a comprehensive view of the data.

### **Funds management**

Centralizing your billing efforts can offer better overall value while providing increased visibility to current and potential funding. Gainwell supports electronic and paper claiming to various standardized and state-specific payor organizations, including insurance, Medicaid, CHIP, Family Cost and others. We provide customized solutions that:

- Ensure timely submission of claims
- Facilitate resolution of denied claims
- Re-submit denied claims where appropriate
- Utilize multiple funding sources where available
